

Adding a lock icon to disabled listview cells

1. Open the **Personalize** program (SYSPRO ribbon bar > Home > Personalize).
2. Select the *Listviews* tab.
3. Enable the *Show lock icon for disabled listview cells* option.
4. Apply your changes.

Adding a skin for a specific company

1. Open the **Personalize** program (SYSPRO ribbon bar > Home tab > Personalize).
2. Select the *Environment Options* tab.
3. Select the theme required at the *Overall theme for user interface* field.
4. Enable the *Save theme for this company only* option.
5. Apply your changes.

Adding a sunken appearance to a field

1. Open the form you would like to maintain.
2. Right-click on the field.
3. Select *Options*.
4. Select *Sunken Appearance*.

Adding a theme to a listview

1. Open the program that contains the listview to which you want to add a theme.
2. Right-click on the listview column header.
3. Select the drop-down button at the *Themes* field.
4. Select the theme required.

Adding a theme to a field

1. Open the form you would like to maintain.
2. Right-click on the required field on the form.
3. Select *Field Properties* from the context menu.
4. Select the theme at the *Theme* field.
To apply the theme to all captions in the form, select a theme at the *Theme for all captions* field.
5. Select *Close* to return to the form to view the change made to the field.

Adding multimedia to a form

1. Open the form you would like to maintain.
2. Right-click on the required field.
3. Select *Insert Multimedia Object* from the context-sensitive menu.
4. Select the type of multimedia to be inserted.

Adding opacity to docking panes

1. Open the **Personalize** program (SYSPRO ribbon bar > Home > Personalize).
2. Select the opacity of the floating pane.
3. Select the *Docking Panes* tab.
4. Adjust the degree of opacity at the *Opacity for inactive floating panes* field.

5. Save your changes.
6. Exit the program.

Adding a user-defined theme

Ensure that you have saved the personalized skin in `../base/skinframework` on the client machine.

1. Open the **Personalize** program (SYSPRO ribbon bar > Home tab > Personalize).
2. Select the *Environment Options* tab.
3. Select *{user defined}* at the *Overall theme for user interface* field.
4. Browse for the skin at the *User defined skin* field.
5. Select *OK*.
6. Apply your changes.

Adding a watermark image to a listview

Ensure that you have saved the BITMAP (.bmp) image in the `.../base/samples` folder on your client machine.

1. Open the listview to which you want to add a watermark image.
2. Right-click on the listview column header.
3. Select *Customize*.
4. Enter the name of the bitmap file in the *Watermark file* field.

To remove the watermark, delete the entry in the *Watermark file* field.

Adding a XAML theme

1. Open the listview you want to maintain.
2. Right-click on the required column header.
3. Select *Customize*.
4. Select the *Macro* option from the form's shortcut menu.
5. Select the event you want to maintain.
6. Select *Edit VBScript*.
7. Construct the necessary code requirements within the *vbscripts* pane.
8. Save your changes.

Removing shading from a sorted column

1. Open the **Personalize** program (SYSPRO ribbon bar > Home > Personalize).
2. Select the *Listviews* tab.
3. Deselect the *Shade sorted columns* option.
4. Apply your changes.
